

PILAK

APPLICATION

PILAK oil is used for lubrication and maintenance of chainsaw chains and guide bars used in forestry, horticulture, households, etc. Also for lubricating other cutting tools and machinery used in clearing forests as well as for transfer chains and machine subassemblies.

ADVANTAGES

- Outstanding lubrication properties – prevents chains from jamming or breaking
- Protects from corrosion and abrasion
- Guarantees parameter stability at both low and high operating temperatures

Parameters	PILAK
Kinematic viscosity at. 40°C, [mm ² /s]	65
Viscosity index	130
Flash point, [°C]	230
Pour point, [°C]	-27
Notice: The above parameter values are typical. The actual values are to be found in the laboratory report attached to each batch of the product.	

ADDITIONAL INFORMATION

Chemnaft oils need to be stored in steel or polyethylene containers protecting the product from damp and mechanical impurities. Given the available knowledge, the product does not have an adverse impact on humans, if used properly. Safety information is to be found in the current material safety data sheet.
